

# AHMET TARIK BOSTAN

## SOFTWARE ENGINEER

### SUMMARY

I have been a basketball player and team captain in the regional league for 13 years, and I have also been a 5-year E-Level Basketball Coach. For this reason, being in the team concept has helped me a lot in terms of both human management and teamwork and empathy. I work as a full-stack software developer in the IT industry.

### WORK EXPERIENCE

**Software Engineer**

**Sofftech**

2021- Ongoing

I carry out the development and maintenance of banking and banking applications. In addition, I am involved in the transition process of the projects of the team I am affiliated with within the scope of technology transformation. The technologies I use in this context are mainly .Net , Java , Javascript and Cobol.

**Software Engineer**

**Magiclik Digital Solutions**

2021

I took part in the application development team using .Net and .Net Core technologies. I supported the CMS projects of many institutions from banking to private institutions.

**Software Engineer**

**Business Intelligence Bridge**

2020-2021

I develop Web-based projects using Angular on the Front-End side, .NET and .NET Core on the Back-End, and PostgreSQL and MySQL on the Database. I took part in all end-to-end processes from the deployment of these projects to the Docker environment.

**Cashier-Accounting**

**Inditex-Zara**

2019-2020

I worked in the in-store buying and selling department.

**E Level Basketball Coach**

**Clubs Affiliated to Turkish Basketball Federation , ANKARA**

2012-2019

I have worked with athletes of all ages and coached and guided them to become a good individual and then a good athlete both in their professional and private lives.

### EDUCATION

**Master- Software Engineering**

2020-2022

Hacettepe University

**Bachelor-Statistic**

2015-2019

Ankara University

### EXAMINATION INFO

**YDS – Score:80**

08.09.2019

**YÖKDİL – Score:87**

01.09.2018

## COMPETENCIES

### Programming Languages

- \*C#
- \*Html
- \*JavaScript
- \*Css , Scss
- \*TypeScript
- \*COBOL

### Frontend Libraries

- \*Angular Material
- \*PrimeNG
- \*Ngx – Bootstrap
- \*Bootstrap 4
- \*React.js
- \*Redux

### Framework

- \*Angular
- \*ASP.NET
- \*ASP.NET CORE
- \*ASP.NET Web Forms

### ORM Tools

- \*EntityFramework

### Database

- \*PostgreSql
- \*MySql
- \*DB2
- \*Firebase

### Web Application Framework

- \*Asp.Net BoilerPlate
- \*Asp.Net BoilerPlate Zero

### Backend Techs.

- \*Hangfire
- \*FastReport
- \*Autofac
- \*Fluent Validation
- \*Asp.Net Identity

## PROJECTS

### Sofftech

**Mission :** Software Engineer

**Job Desc. :** Developing and maintaining all businesses connected to İşbank's deposit team and starting to develop them in all channels (branch, İşCep, etc.) within the scope of technology transformation.

---

### Magiclick Digital Solutions

**Project Name :** Medipol Hospitals ve Medipol University Cms Project

**Mission:** Software Engineer

**Job Desc.:** Development and maintenance of content application made with Asp.Net Web forms technology using Microservice Architecture

---

### Business Intelligence Bridge

**Project Name:** NACORAC(National Center for Coordination and Joint Risk Analysis)

**Mission:** Software Engineer

**Job Desc:** Database design with PostgreSql using Microservice Architecture, writing APIs with ASP.NET Core on the back-end, user interface designs with Angular 8+ on the front-end.

**Project Name :** Online Exam System

**Mission:** Software Engineer

**Job Desc:** It has been developed for primary, secondary and high school students using Angular 8+ on the Front-End side, .Net Core on the Back-End side, PostgreSql as the database, and Big Blue Button, a video conferencing technology to provide a secure environment.

**Project Name:** Smart Agenda Student Homework Responsibility Tracking System

**Mission:** Software Engineer

**Job Desc:** It has been developed by using Angular 8+ on the Front-End side and .Net Core on the Back-End side and PostgreSql as the database, as an application where students can follow their homework and various other responsibilities as well as their activities. It is currently used as a demo by **Norman Schools**.

**Project Name:** Easy Memorization

**Mission:** Software Engineer

**Job Desc:** By using Angular 8+ on the Front-End side and .Net Core on the Back-End side and PostgreSql as the database, the system determines the words that students need to memorize on a daily basis, by uploading the concepts that students want to memorize, both textual and pictures and pdfs, using a specific algorithm. A memorization assistant application that presents these words to students has been developed. It is currently used as a demo by **Norman Schools**.

**Project Name:** Digital Archive File and Folder Sharing System

**Mission:** Software Engineer

**Job Desc:** File and folder sharing system has been developed using Angular 11 on the Front-End side and .Net Core on the Back-End side and PostgreSql as the database. Hadoop is used as the file storage system.
